

Mixology

Manual Cold Brew

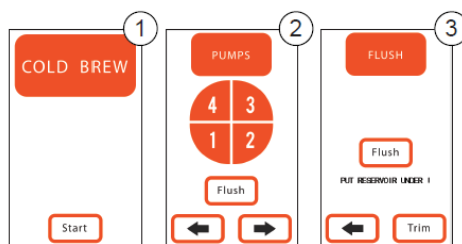

Frequency: *Daily, at closing*

Materials Needed:

- Cold Brew System Dishwasher Basket
- Sanitizer Solution
- Bar Towel

01 – Flush the system

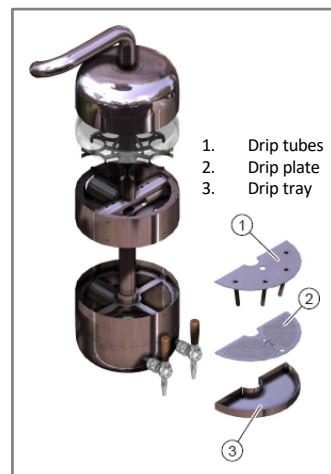

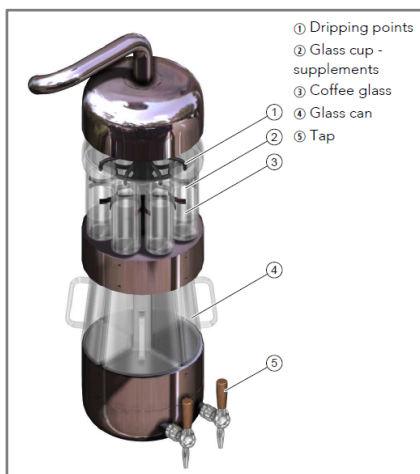

- Ensure glass cans are empty and in place.
- Start the user interface.
- Select *Start* and the *Pump* screen will show.
- Select all 4 pumps – the buttons will turn red.
- Select *Flush* to go to that screen, and then press *Flush*.
- When the 10-second system flush is complete, empty the glass cans.

01 Flush the system

02 – Clean the brewer

- Dump used coffee grounds into compost.
- Clean the cups, glasses, cans, drip tubes, drip trays and drip plates in the dishwasher using the cold brew system dishwasher basket.
- Wipe/dust all components.

02 Clean the brewer

Reference separate standard for Trailblazer Unit.

02 Dishwasher Basket

Mixology

Manual Cold Brew

Frequency: *Monthly*

Materials Needed:

- *Pump Cabinet Key*
 - *Spare Filter (if needed)*
 - *Paper Towels*
-

- *Bar Towel*

01 – Check the Pump Cabinet for leaks or water scaling

- Open the door cabinet with the key.
- Visually inspect the interior of the cabinet for signs of leaking or scale build-up. If either are present, contact the FCC for service.
- Close and lock the cabinet door.

01 Open the cabinet door, and check for leaks or water scaling

02 – Clean the Pump Cabinet dust filter

- Use the blue tab to open the dust filter cover. Remove the filter.
- Rinse the filter clean with warm water in the 3-compartment sink.
- Blot the filter dry with clean paper towels.

NOTE: If the filter does not come clean, replace it. Clean filters should be on hand in your spare parts.

- Place the filter back in the housing, and close the cover.

02 Open the dust filter cover

02 Rinse the filter

03 – Wipe the fins of the filter vent

- Use a clean, damp towel.

03 Wipe the fins of the filter vent
