

Other Brewing Equipment

Toddy Iced Coffee Brewer

Frequency: *Daily at End of Day or After Each Use*

Materials Needed:

- ClickSan® Disinfectant/Sanitizer

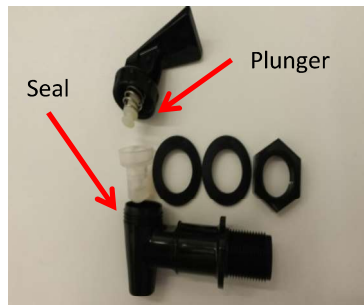

- Wiping Cloth

SDS:

A Safety Data Sheet for ClickSan® Disinfectant/Sanitizer can be found on the Partner Hub and in your First Aid Kit.

01 – Remove the spigot from the plastic insert

- Unthread nut inside.
- Note rubber washer locations (one on outside of brewer between spigot and brewer, one on inside between nut and brewer).

02 Disassemble valve

03 Clean brewer and lid

02 – Disassemble valve

- Unthread the 'handle' and then separate the two pieces.
- Remove the seal by pulling it off the plunger.

03 – Clean brewer and lid

- Invert toddy brewer and place lid on pegged dishmachine.

Note: Valve parts need to be hand washed at the three-compartment sink.

05 Reassemble

04 – Wash valve parts

- Use a brush to clean inside valve.
- Wash, rinse, and sanitize all parts using three-compartment sink method.
- Allow to air dry.

05 – Reassemble

- Reassemble spigot and install back into the Toddy brewer.
- Make sure that washers are installed correctly.
- Hand tighten nut on inside of brewer.
- Store inverted or with lid on.
- Do not store brewer where it may become contaminated.
- Do not store on floor.
