

Instructions for Mixology garnish.

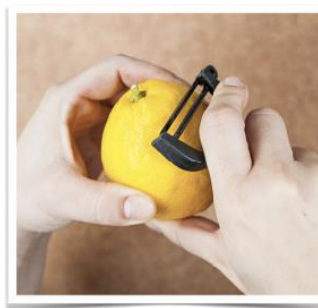

1. Double wash hands. Be careful when using a Y peeler.
2. Hold the fruit between your thumb and middle finger towards the equator.
3. Bring your index finger up around the Y of the peeler, anchoring your thumb at the base of the fruit.
4. When holding the fruit with both hands, it should look like this (see image of step #4).
5. Adjust your hold on the fruit with your left hand and move your anchor (thumb) as you work your way down the swath.
6. As you come to the end of the swath, rotate your left hand so as to pinch the front end of the swath down.
7. Turn your right hand and swipe the blade away from you to square off and cut the swath from the fruit.
